Life is stressful for high schoolers. The suicide rate for U.S. teens and young adults is the highest ever. One in five children between the ages of 13 and 18 have or will have a serious mental illness. Growing up now has a different set of challenges not experienced by today's parents. Come understand these challenges and acquire the tools to recognize when our kids need help. Join the ENLOE PTSA and our two distinguished guests for an evening of information and conversation about teen mental health.
